In This Issue:

Welcome to the seventh issue of *Ennovate* - the NCIDE eNewsletter. This issue contains an article on Vision 2020 report developed by the Planning Commission. The article highlights the aspects related to education. The article on Re-usable Learning Objects (RLO) discusses the RLO technology as a new paradigm in Life Long Learning. From this issue onwards we plan are going to include an article on innovations made by Indians in different fields. This issue discusses the significance of the Ramanujam Number. This issue also list some of the events held at NCIDE.

Notable Quotable:

Learning and innovation go hand in hand. The arrogance of success is to think that what you did yesterday will be sufficient for tomorrow.

William Pollard

We at NCIDE highly value your comments and feedback on the Newsletter and the articles, and look forward to receiving your suggestions. We also welcome your contributions for the future issues. Please send us your mails at: ncide@ignou.ac.in

Vision 2020: India in the New Millennium

The Vision-2020 report developed by the Planning Commission, Govt. of India in December, 2002 envisages that "by 2020 the people of India will be better educated, healthier and more prosperous, than at anytime in its long history. India in 2020 would be a nation bustling with energy, entrepreneurship and innovation". The education aspect of the Vision 2020 report developed by Prof. J.S Rajput defines Knowledge Society as a society where caring, sharing and using knowledge are key factors promoting prosperity and well being of the people. Re-usable Learning Objects (RLO): Innovation in Technology Mediated Open and Distance Learning

RLO Technology is a new paradigm in Life Long Learning. RLOs are the e-educational resources available freely and openly to any one who can use, re-use, remix, recycle and redistribute it in restricted or un-restricted manner. RLO is the smallest standalone and an independent unit of learning designed for re-use in multiple instructional context. [More...](#)

Indian Innovations from the Past: Significance of the Ramanujam Number (1729)

With effect from the current issue of *Ennovate* we are going to present an article on innovations made by Indians in different fields. The idea is to provide information about the work of innovation in a very simple manner. In this issue, we are taking up the *Ramanujam Number* which is attributed to Srivnivas Ramanujam.
